Injector Needles

Marek Parts & Supply offers replacement injector needles engineered for accurate brine distribution across the most widely used meat injector systems in the ham, pork, beef, and poultry processing industry. Every needle is built to match OEM dimensions and spray-pattern performance, giving processors a dependable, cost-effective alternative without compromising accuracy or consistency on the line.

We supply compatible needles for most major injector models, including:

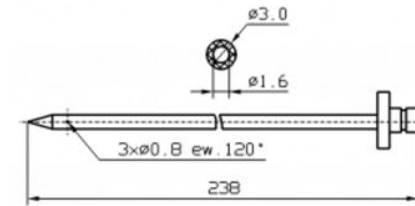

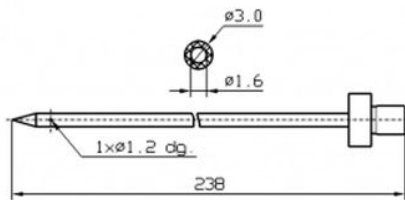

- | | |
|---------------|---------------|
| • Fomaco | • Belam / CFS |
| • Gunther | • Garos |
| • Inject Star | • Metalquimia |
| • Schroder | • Lutetia |
| • Ruhle | • Suhner |

Many other injector needle types are available. Contact us for a quote on the specific model or configuration your line requires.

Brand names and trademarks referenced in this catalog are the property of their respective owners. Marek Parts & Supply is an independent supplier of compatible replacement parts and is not affiliated with, sponsored by, or endorsed by Fomaco®, Gunther®, Suhner®, Inject Star®, Schroder®, Ruhle®, Belam®, CFS®, Garos®, Metalquimia®, or Lutetia®.

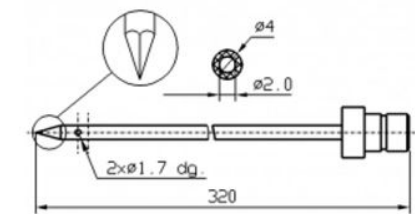

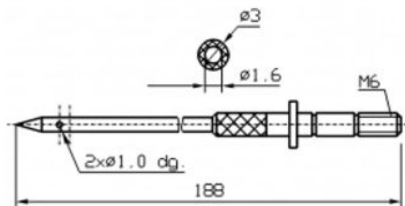

Fomaco

Marek Parts & Supply stocks a full range of Fomaco-style injector needles engineered to match OEM spray-pattern geometry and thread specifications. These needles are a dependable fit for high-volume ham, pork, and poultry injection lines that rely on consistent, accurate brine distribution.

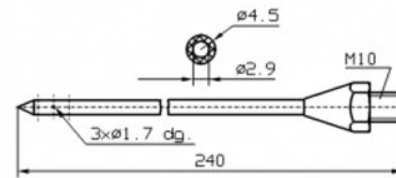

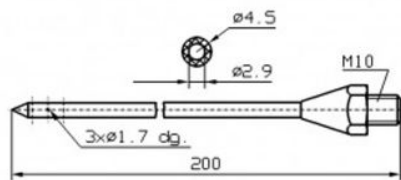

Gunther

Built to Gunther OEM tolerances, these replacement needles keep curing and marinating lines running with the same precision processors expect from factory parts, at a more competitive cost.

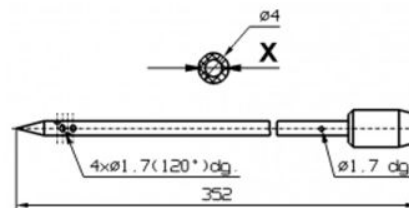

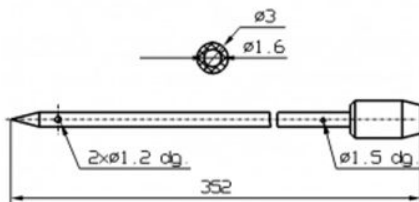

Inject Star

Compatible replacement needles for Inject Star injector heads, manufactured to maintain proper flow rate and penetration depth across ham, beef, and poultry applications.

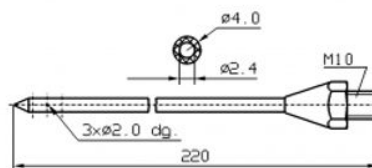

Schroder

Schroder-compatible injector needles designed to match original spray hole patterns, helping processors maintain uniform product weight and cure distribution.

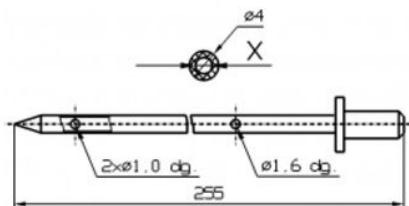

Ruhle

Precision-made replacement needles for Ruhle injector systems, offering the same fit and reliability as OEM parts for continuous production runs.

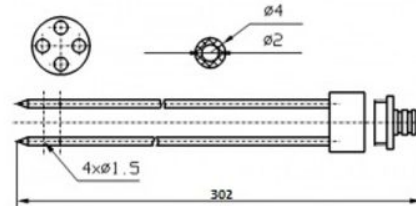

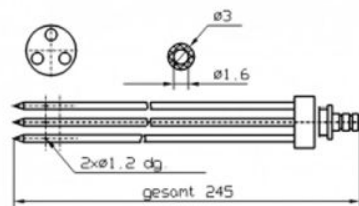

Belam / CFS

Replacement injector needles compatible with Belam and CFS injector heads, built to keep brine distribution accurate line after line.

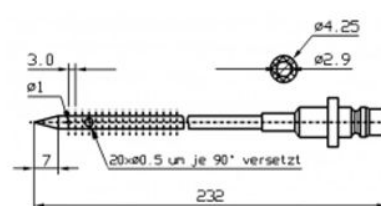

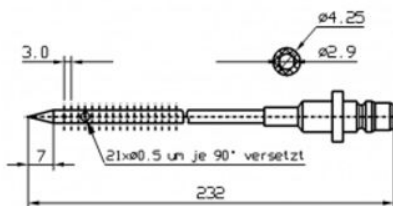

Garos

Garos-compatible injector needles manufactured to OEM specifications for dependable performance in demanding processing environments.

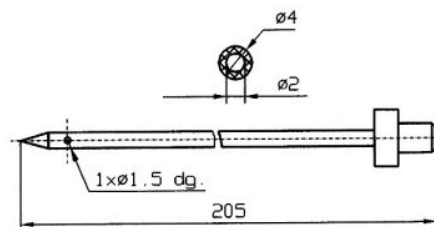

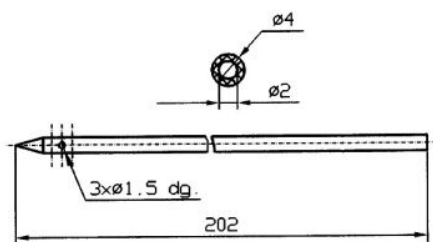

Metalquimia

A dependable, compatible alternative to OEM Metalquimia injector needles, built to preserve accurate injection pressure and spray pattern.

Lutetia

Compatible replacement needles for Lutetia injector systems, engineered for consistent brine flow and long service life.
